This meeting is a community member initiative in partnership with PWA.

It is facilitated by Poz Gay Men who identify as substance users. We provide a gay positive space where anyone who is HIV+ and is or was a substance user is welcome to attend.

We follow a HARM reduction model which means that we support the goals of the individual including: abstinence, reduction and maintenance, HARM reduction believes in safety first.

We strive to provide a safe, non-judgemental space for HIV+ substance users to discuss: Common Issues, get and share information and be supportive of one another.
